

What is the No-Spill WaterSafe® System and how does it protect the quality of Belle Montagne Premium Bottled Spring Water?

Coffee Distributing Corp. is dedicated to maintaining the highest possible standards in quality, service and innovation. A prime example of this is our incorporation of the revolutionary No-Spill WaterSafe® System, a patented breakthrough with a two-fold purpose:

- 1) Since the cap stays on the bottle *all the time*, you'll never spill water again when changing bottles on your water cooler, and
- 2) The bottle, water reservoir and cooler work together as a sealed protected unit, keeping dust and airborne particles out – your further assurance that *Belle Montagne Premium Bottled Spring Water* is as clean, pure, and refreshing as it was when it flowed from its source.
