## PEET'S TEA

### Why Not Serve the Finest Cup of Tea?

Peet's Coffee & Tea was founded in 1966 by coffee and tea merchant Alfred Peet, who believed that craftsmanship and attention to detail produced superior results. This attention to quality includes the world's finest teas.

### Teas from the World's Top Producers

#### Quality from Field to Cup

Peet's premium teas elevate your tea service to a higher level and are an amazing value. Our tea buyers seek out black, green, and oolong teas of the finest quality from the world's top tea estates. We carefully select single-origin teas from the year's harvest, seeking out unique producers who grow, harvest, process, and grade the teas that have the quality and flavor we require. Over the years, our European-style black teas have been augmented by oolongs, green teas from Japan and China, and our famous proprietary blends. We also offer a selection of fine herbals and herbal blends for our customers who prefer a flavorful cup without caffeine. Utilizing our long-standing relationships with suppliers in each tea origin, our buyers taste hundreds of samples each year to identify outstanding small-lot teas. All of Peet's tea and herbal blends are proprietary mixtures unavailable elsewhere.

### Skillful Blended and Shipped Fresh

Designing our tea line is our Director of Tea, who has been with Peet's since 1985. He is a member of the Specialty Tea Institute, is world-renowned for his expertise, and speaks frequently at tea industry events. Peet's teas are always freshly selected from the most recent crop year. Each individual teabag is wrapped in an air and moisture barrier material to ensure the freshness of each cup. The result is a skillfully blended and fresh cup of Peet's fine tea.

Match the finest coffee with the finest teas.
